ACOUSTICAL WALL & CEILING PANELS

SHAPES

CUSTOM SHAPED WALL & CEILING PANELS

Livello custom shaped acoustical wall and ceiling panels offer a great acoustic solution with the added benefit of geometric designs. Our standard fabric wrapped fiberglass panels can be cut into a variety of shapes such as triangles, circles, trapezoids and hexagons.

Optimization of acoustics within a space is usually the primary focus, but there's also an opportunity to create a design-driven aesthetic while controlling the noise. The custom capabilities we offer with our various shaped panels provide limitless possibilities for creativity and allows for each project to be unique to the needs of the client.
